1. Safety instructions

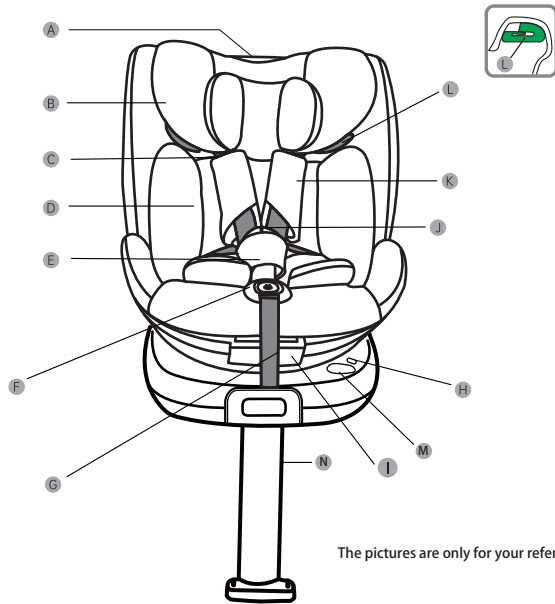

- Read this instruction manual carefully.
- The correct fitting of the ISOFIX attachment and Support leg anchoring systems of 3-point belt is of vital importance for the safety of your child.
- For the future use of the seat, it is important that you keep the instruction manual carefully.
- Never leave your child unattended in the car.
- Do not use a child safety seat if the vehicle seat is equipped with a front airbags. This can be dangerous. This does not apply to so-called side airbags.
- Before use our product, please read the instruction manual carefully.
- The product is a safety product and is only safe when used in accordance with the instruction manual.
- The product must only be used on a forward facing seat that is fitted with the ISOFIX attachment and Support leg .
- The product may be used on either the front or the back seat. However, we recommend that it is fitted on the back seat.
- The product has been approved according to the strictest European safety standards (ECE R129/03) and is suitable for 40-105cm (mass limit $\leq 18\text{kg}$) with the ISOFIX attachment and the Support leg ; 76-105cm (mass limit $\leq 18\text{kg}$) with the ISOFIX attachment and the Support leg ; 100-125cm with 3-point belt; 100-125cm with 3-point belt and ISOFIX attachment.
- After an accident the seat may become unsafe due to damage that is not noticeable immediately. It should therefore be replaced.
- The safety of the seat can only be guaranteed by the manufacturer if it issued by the original owner.
- We advise you strongly that not to use a second-hand product, because you are not sure what has happened to it.
- The harness pads are important for the safety of your child, therefore use them at all the time.
- Ensure that all luggage and objects likely to cause injury in the event of an accident are properly secured.

- The moving parts of the car seat should not be lubricated in any way.
- The baby car seat must not be used without the cover. Please use an original cover, as the cover contributes to the safety of the seat.
- The seat must be secured with ISOFIX attachment, even when it not on use. An unsecured seat may injure other passengers in the car in an urgent stop.
- The rigid items and plastic parts of a child restraint must be so located and installed that they are not liable, during everyday use of the vehicle, to become trapped by a movable seat or in a door of the vehicle.
- Ensure that the seat is not damaged by the webbing between or underneath heavy luggage, adjustable seats or slamming the car door etc.
- No alterations may be made to the product as this could affect part or the overall safety of the seat.
- In hot weather the plastic and metal parts of the product will be hot. You should cover the seat when the car parked under the sun.
- In order to prevent damage to the cover, do not remove the product's logo.
- Use the seat even in s short journey, as this is when most accidents occur.
- Before the purchase, please check that the seat is properly in your car.
- Take a short break in long journey , So that your child has some time for the relaxation.
- Set a good example your child and always wear your seat belt.
- Tell your child that he/she should be never play with the harness buckle.
- Make sure that any straps is properly fastened (worn low down) and not twisted.
- Any lap strap is worn low down, to keep the pelvis is firmly engaged.

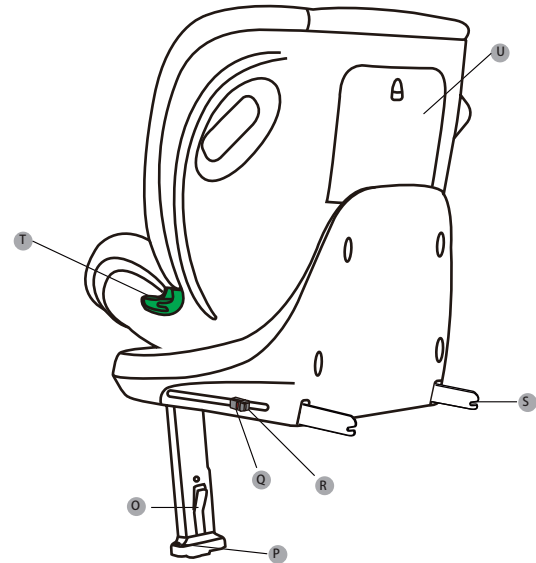

DO NOT place rear-facing child seat on front seat with airbag. IMPORTANT-DO NOT use forward facing before the child's age exceeds 15 months. DEATH OR SERIOUS INJURY can occur.

3. Notice for the vehicle use

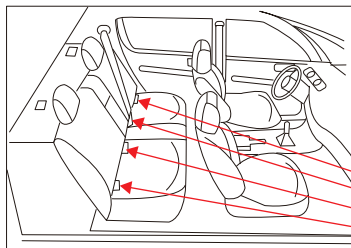

! The baby car seat must not be used into the position of a seat where there has an airbag (airbags can be fatal to children). Please read the instructions carefully in order to properly use of child safety seats.

 Correct installation /suitable  wrong installation /unsuitable

! Must not be used in the passenger seat where airbags have been activated.

Baby car seat ISOFIX attachment

Anchor for the ISOFIX attachment under the seat

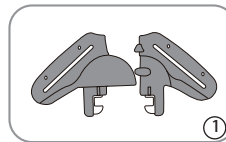

Read the car manual first and check whether the car seat is equipped with ISOFIX attachment fixed anchor points, and check the size of recommended ISOFIX attachment constraints on the system if it is matched our ISOFIX attachment size.

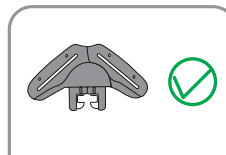

Height	Size	facing direction
40-105cm	ISO/R2	rearward facing
76-105cm	ISO/F2X	forward facing
100-150cm	ISO/B2	

4. The adjustment and installation of child safety seat

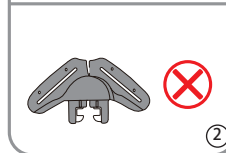

4-1 The usage of buckle

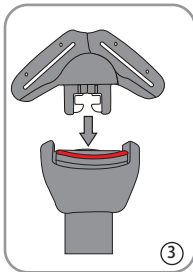

1. Close the left and right latches of the buckle (as shown in Figure 1) and ensure that the concave and convex structures of the left and right latches are closed

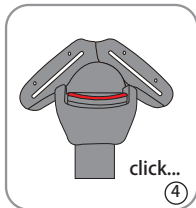

2. Close the left and right latches without leaving a gap. Keep the latches facing up. (Figure 2)

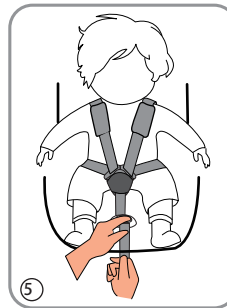

3. Insert the closed latches into the slot of the buckle. (Figure 3)

4.If you hear "click" sound, it means that the buckle has been fastened. (Figure 4)

4-2 adjust the safety belt.

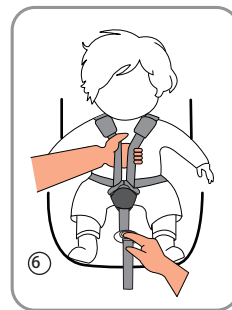

1.Tighten your baby car seat belt
Pull the shoulder strap up to tighten the loose part of the leg belt. Then pull the adjustable belt to tighten the belt.

Keep your seat belt as tight as possible without causing discomfort. The leg belt should be as low as possible and should be near the crotch, not the belly.

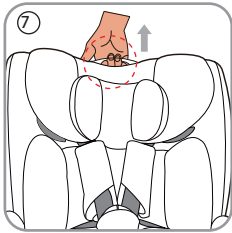

A finger space should fit between the seat belt and the child.

A loose seat belt is dangerous. Check that the seat belt adjuster is working properly each time when you place a child in a car seat before tightening the seat belt.

2. loose the seat belt
The seat belt can be loosened by pressing the 5-point seat belt adjustment button in front of the seat. While pressing down the 5-point seat belt adjustment button, hold the two straps under the shoulder guard with the other hand and pull them in front of the child to release the seat belt

4-3 adjust the height of headrest

1. Use the five-point seat belt adjustment button under the front of the seat to loosen the seat belt, unlock the buckle, pull the headrest adjustment handle up, move the headrest to the correct shoulder belt height, and then gently slide the headrest down to check that the headrest is properly hinged.

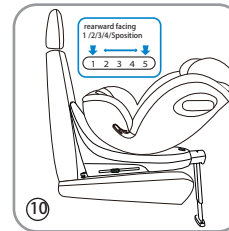

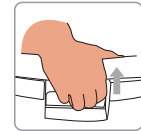

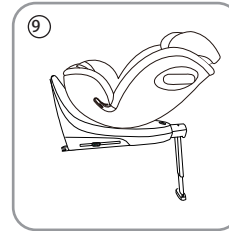

2. Correctly adjusting the headrest can ensure the best protection for your child in the car seat; The headrest must be adjusted to the position that the shoulder strap is compatible with the height of a child's shoulders or slightly higher. The straps must be located at shoulder height or slightly above the child's shoulder height. The shoulder strap should not be behind the child or at or above the ear.

 **Note:** It is important to keep the headrest appropriate to the height of the child's head.

4-4 adjust the angle reclining of car seat

The child safety seat can be adjusted to different reclining positions. You can adjust the reclining angle of the seat even when your child is in it

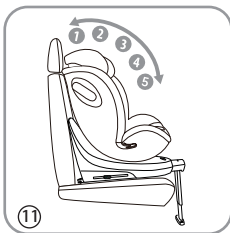

rearward :

Press the base part of the seat with one hand and pull the angle adjusting handle on the back of the seat with the other hand to adjust the seat to the appropriate position, 5 positions in total.

when the baby car seat is rearward facing
pls use 1,2,3,4,5 position

forward facing:

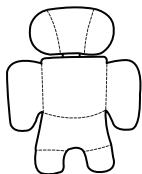

Press the base of the seat with one hand and pull the angle adjusting handle on the back of the seat with the other hand to adjust the seat to the appropriate position, a total of 5 positions.

when the baby car seat is forward facing pls use 1,2,3,4,5 position

11

4-5 New born cushion

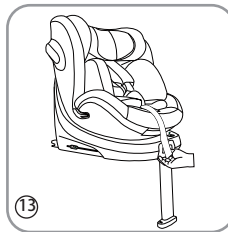

Notice:

1. When the height of baby is 40-75cm, please use the newborn baby's cushion.

12

Place the new born cushion in the car seat, place the two shoulder pads on the new born cushion, and finally cover the buckle cushion on.

4-6 rotation function

13

1. Take the supporting leg out of the storage at the bottom of the base;
2. Press the supporting leg expansion button and pull out the leg;
3. Press the rotation button and rotate the seat.

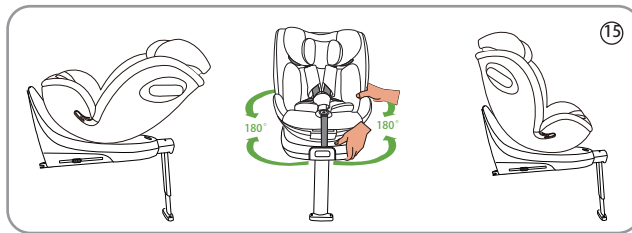

Attention !Before each trip, pls make sure that the seat rotation is locked by turning the seat in both directions.

"IMPORTANT-DO NOT USE FORWARD FACING BEFORE THE CHILD'S AGE EXCEEDS 15 MONTHS(Refer to instruction)"

Attention!Before each trip, pls make sure the child seat is in the correct group and configuration.

15

4-7 5-point harness system to install the child

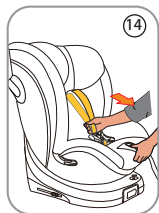

1. Release the safety belt to the most loosely, then unlock the buckle and place it on both sides of the seat, as shown in the picture

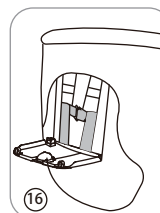

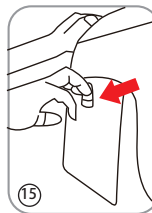

2. Insert the left and right latches into the buckle and hear a "click" sound, indicating that the buckle is fastened. Press the adjustable belt button to adjust and tighten the shoulder strap, while ensuring that the child's shoulders are comfortable (a finger space should fit between the seat belt and the child).

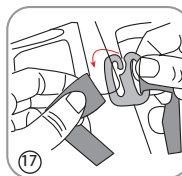

4-8 The method to remove the 5-point seat belt system

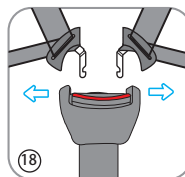

1. Pull the strap out which is together with the three-way connection as long as possible and place this position as show.

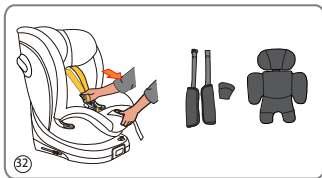

2. Rotate the Child Restraint System to the back and open the back cover (Figure 15). Figure 16 shows the internal state after opening.

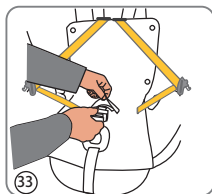

3. Release the shoulder strap from the shoulder clip, and finally pull the shoulder strap and shoulder pad out.

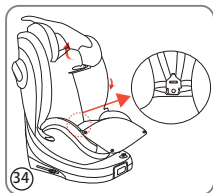

4. Pull out the adjusting strap and release the two shoulder straps from the three-way connection metal clip as shown in the figure

5. Press the red button to open the buckle.

6. Pass the buckle (without insertion) through the hole as shown in Figure 33

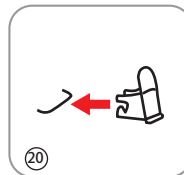

7. Open the upholstery like the picture, fasten the insertion to buckle, open the buckle cover under the base, put the buckle to the buckle hole and finally close the cover.

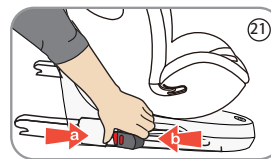

8. Clear up the upholstery as shown in Figure 35.

4-9 installing method for ISOFIX attachment

Notice: Child safety seats can also be used with the ISOFIX attachment guider.

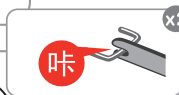

The installation is more convenient, please clip the ISOFIX attachment guide on the ISOFIX attachment anchor point on the ISOFIX attachment fixed point of the automobile, and the make notch faces upward

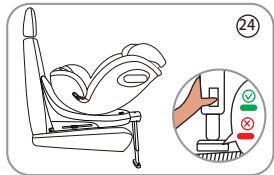

Notice: If your car seat can adjust the angle, pls adjust the car seat angle to the appropriate position, it will be more convenient for ISOFIX attachment installation.

1. Press ISOFIX attachment lock released button and ISOFIX attachment 2nd lock button (as shown in Figure 21) at the same time, then push ISOFIX attachment out.

2. Grab the child seat with both hands, then push the two ISOFIX into the ISOFIX guider until the ISOFIX is stuck on both sides, and hear click. When the ISOFIX is locked, pls push the child safety seat vigorously in the direction of the arrow to make it fit the back of the car seat (figure 22).

4-10 Installation of Support leg

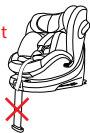

1. Take the Support leg out from the storage bin at the bottom of the base
2. Press the expansion button to pull the support leg out
3. Place child in car seat and secure with 5-point seat belt system

Notice: when the Support leg touches the car surface, the Support leg indicator must be all green (as shown in the figure 24)

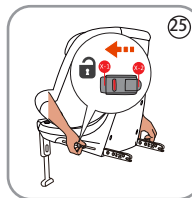

- Warning:**
1. Check and tighten ISOFIX attachment, Support leg and 5-point seat belt system to ensure seat and child are firmly fixed.
 2. The 5-point seat belt should not be twisted or wound.
 3. When installing the car seat by rearward facing and children's height is less than 75cm, it must use new born cushion.
 4. We recommend to install car seat with ISOFIX attachment guider.
 5. The seat must be as close to (against) the back of the vehicle seat as possible
 6. The child restraint system should not be installed in the position where the airbag is installed in the rearward facing position.

Warning: The 100-150cm I-Size Booster seat cannot use the Support leg.

4-11 Remove ISOFIX attachment and hide the Support leg

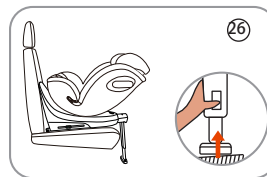

4-11-1 Removing the ISOFIX attachment

1. Press the "ISOFIX attachment unlock button", and hear "click" sound, ensure that both sides of the ISOFIX attachment are unlocked, then remove the seat

Notice: ISOFIX attachment is unlocked correctly only when the left and right ISOFIX indicator show red.

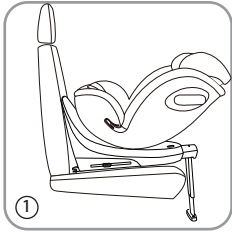

4-11-2 hide the support leg

1. Press the supporting leg adjustment button and pull the Support leg up

5. Installation method

5-1 Making rearward facing position by using ISOFIX attachment+ Support leg (suitable for children height from 40-105cm)

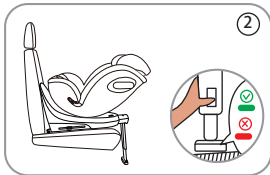

1. When installing the child safety seat in the forward facing position, take the Support leg out from the bottom of the seat according to method 4-10, and then rotate the seat to the forward position according to method 4-6 (see Figure 44). Then according to method 4-9, Installing the ISOFIX attachment to the car seat firmly.

Attention! If your child's height is less than 105cm, pls use rearward facing.

Warning: This child car seat must not be used in a vehicle seat where airbag has been activated.

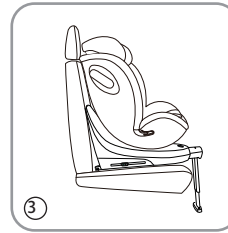

1. Press the supporting leg adjustment button by your hand and pull the Support leg down until it touches the car surface

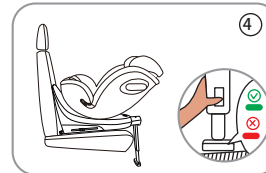

2. Place the child in car seat and secure with 5-point seat belt system

Attention: When the supporting leg touches the car surface, the support leg indicator must be all green (as shown in the figure).

5-2 Installing the child safety seat forward facing position by using ISOFIX attachment+ Support leg (suitable for children height from 76-105cm)

1. When installing the child safety seat in the forward facing position, take the Support leg out from the bottom of the seat according to method 4-10, and then rotate the seat to the forward position according to method 4-6 (see Figure 3). Then according to method 4-9, Installing the ISOFIX attachment to the car seat firmly.

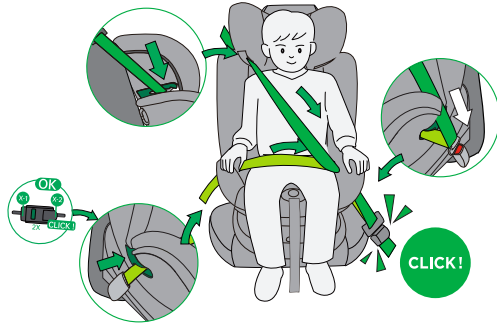

1. Press the Support leg adjustment button by your hand and pull the Support leg down until it touches the car surface

2. Place the child in car seat and secure with 5-point seat belt system

Attention: When the Support leg touches the car surface, the Support leg indicator must be all green (as shown in the figure).

5-3 Installing the car seat forward facing position by using ISOFIX attachment+ 3-point seat belt (suitable for children height from 100-150cm)

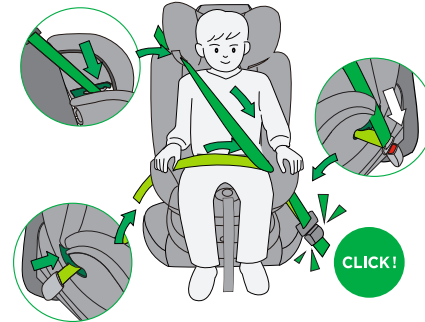

- 1.Remove the 5-point safety belt system before placing the child in this way (see pic 4-8 for details)
- 2.Fasten the car seat through ISOFIX attachment and ISOFIX attachment anchor points on the vehicle seat according to the method 4-9.
- 3.Place the child seat on the vehicle seat and adjust the seat to the appropriate position (see pic 4-4 for details).
- 4.The vehicle seat belt passes through the belt guider and pass the child's shoulder
- 5.Vehicle seat abdominal belt through the belt guider and pass the child's pelvis
- 6.Fasten your car seat belt

 The 100-150cm I-Size Booster seat cannot use the Support leg.

5-4. Use 3-point seat belt to install the child safety seat in forward facing position (Suitable for children height from 100-150cm)

- 1.Remove the 5-point safety belt system before placing the child in this way (see pic 4-8 for details)
- 2.Place the child seat on the vehicle seat and adjust the seat to the appropriate position (see pic 4-4 for details).
- 3.The vehicle seat belt passes through the belt guider and pass the child's shoulder
- 4.Vehicle seat abdominal belt through the belt guider and pass the child's pelvis
- 5.Fasten your car seat belt

 The 100-150cm I-Size Booster seat cannot use the Support leg.

6. Removal and installation of cloth cover

Removal of the cloth cover

1. Adjust the shoulder straps **01**.
2. Press the red button A on the buckle to open the buckle **03**.
3. Take out the inner liner **02** and snap pad **04**.
4. Carefully remove the headrest cover and seat cover from the seat.

Installation of the cloth cover

1. Adjust the head restraint to the highest position.
2. Install the cloth cover onto the seat carefully.
3. Take out the inner liner and snap pad.
4. Install the inner liner and buckle pad.

Tip: When installing the cloth cover, you can use the cloth cover plate R to put the cloth cover back on the seat.

7. Cleaning and maintenance

1. In the daily using, it is necessary to regularly check the child safety seat.
2. In case of accident, the safety seat must be replaced.
When the car seat is not in use, the child safety seat should be placed in a dry and ventilated place to avoid damp and mildew.
3. If there is dust on the surface of the child safety seat, we can use a damp sponge to wipe and ventilate it to dry.
4. If food or drink drops onto the seat belt by accident, pls remove the seat belt and rinse thoroughly with warm water and ventilate it to dry.
5. To clean the entire seat cover, please refer to the washing instructions.
6. Slight fading may occur during the first washing, which it is a normal situation.

Washing instructions:
